

mRadar

The city, listening.

Residents report what's broken. Officials see the whole picture. Institutions fix it. All on one live map of Kraków.

The problem

One broken street light.
Forty phone calls.
Or none at all.

Residents can't see what's already been reported, so they report it again — or give up.

City officials sort duplicates by hand and guess who's responsible.

Institutions hear about it last, and nobody hears back from them.

How it works

One loop. Three screens.

01 · mradar /

Residents

Drop a pin, say what's wrong, send. Then follow the fix on the map.

02 · /operations

City officials

Reports arrive grouped into incidents, with a ticket already drafted. One click approves it.

03 · /institution

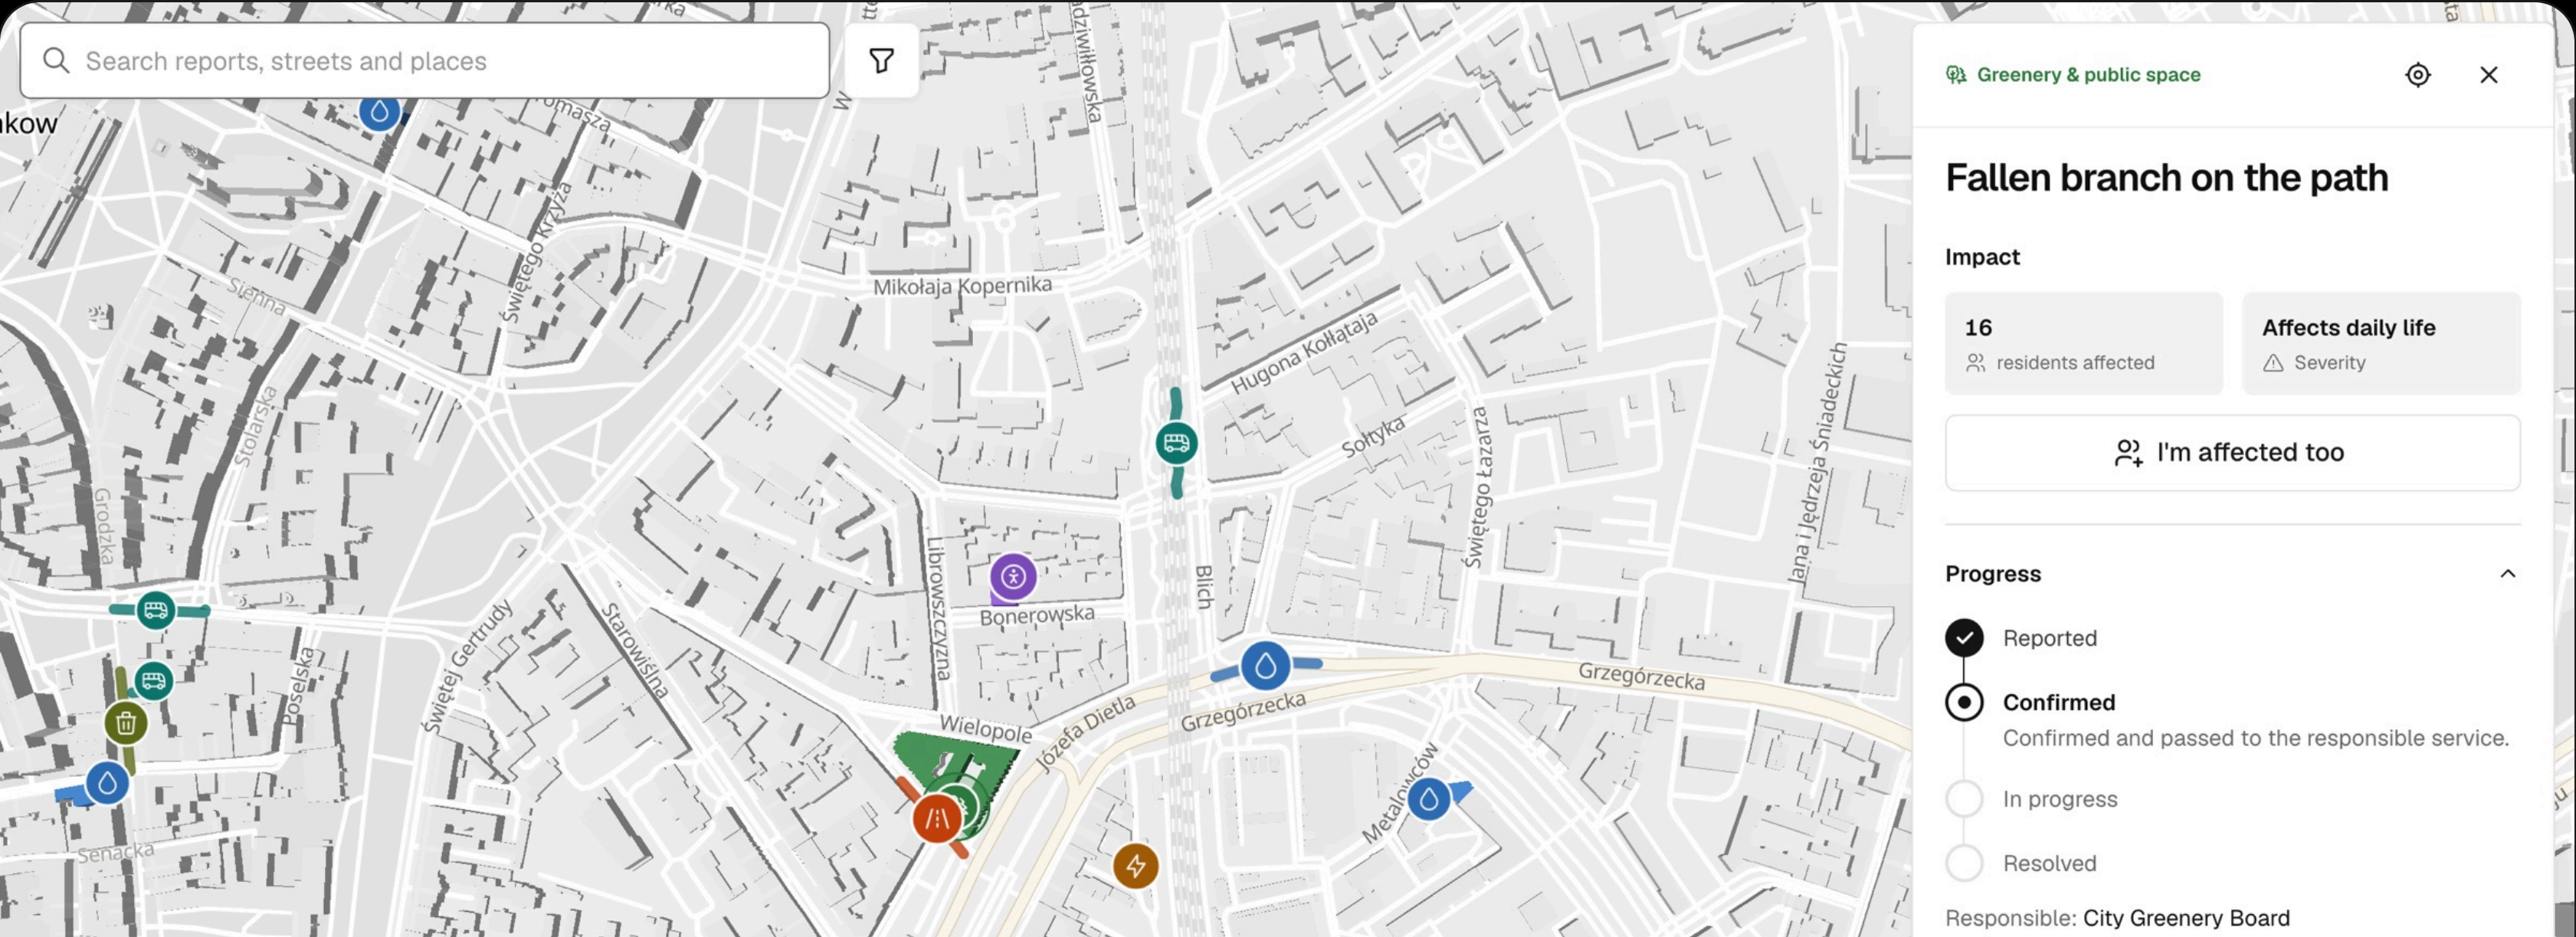

Institutions

The utility gets the ticket, updates its progress, and every resident sees it move.

For residents

See what the city already knows.

A live heatmap shows where problems cluster. Zoom in and every report snaps to the building or road it's about. **Already reported? Tap “I'm affected too.”**

Reporting

Three steps. No account.

- 1 Drop the pin.** Move the map until it sits on the exact spot, or use your location.
- 2 Say what's wrong.** Pick one of eight categories and how serious it is.
- 3 Send.** Your report joins the map and you can follow every step of the fix.

Create a report

Plac Czesława Marchewczyka
Grzegórzki, Kraków

Category

What kind of problem is it?

What is wrong?

e.g. Street light out by the tram stop

Details (optional)

Since when? What exactly is affected? And how serious is it? What should the crew know?

0 / 1000

How serious is it?

☐ Minor
An inconvenience, nothing is blocked.

☒ Affects daily life
Blocks a route, a service or a building

In progress

Resolved

For city officials

Many reports. One incident.

Reports close in place and time are grouped.
An agent drafts the ticket with its evidence. **A person approves before anything is sent.**

Create a service ticket for Electricity Operator

👤 Decision-maker agent ⌚ 7 min ago

Issue	Power outage
Area	ul. Józefa Dietla 40-58, Stare Miasto
Since	about 14:00 (earliest report)
Residents reporting	3 (unverified)
Evidence	R-311, R-312, R-318, OBS-7

Three residents within 120 m and 8 minutes describe the same outage, and the telemetry feed shows a fault on the feeder that supplies the block. The Electricity Operator is mapped to power outages in Stare Miasto.

Review

Hard calls stay human.

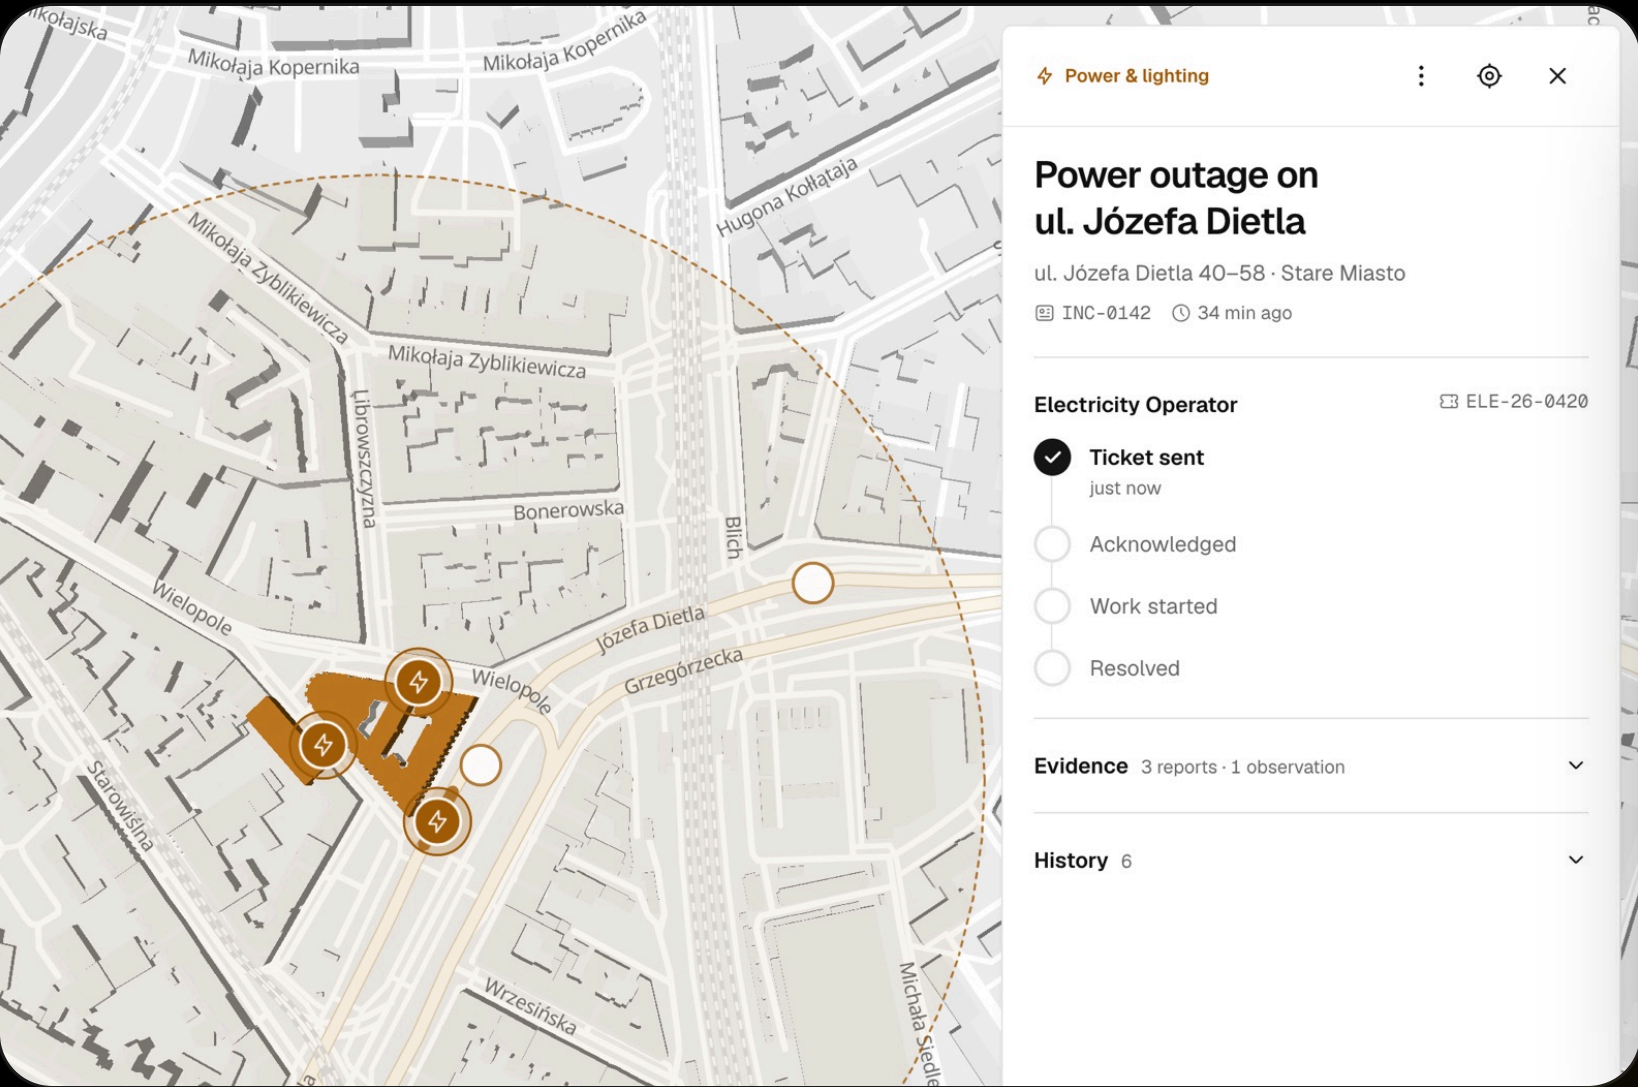

Not sure it's the same problem? Compare the candidates side by side: how far, how long ago, how many reports.

Only inside one flat? Keep it private. It never reaches the public map.

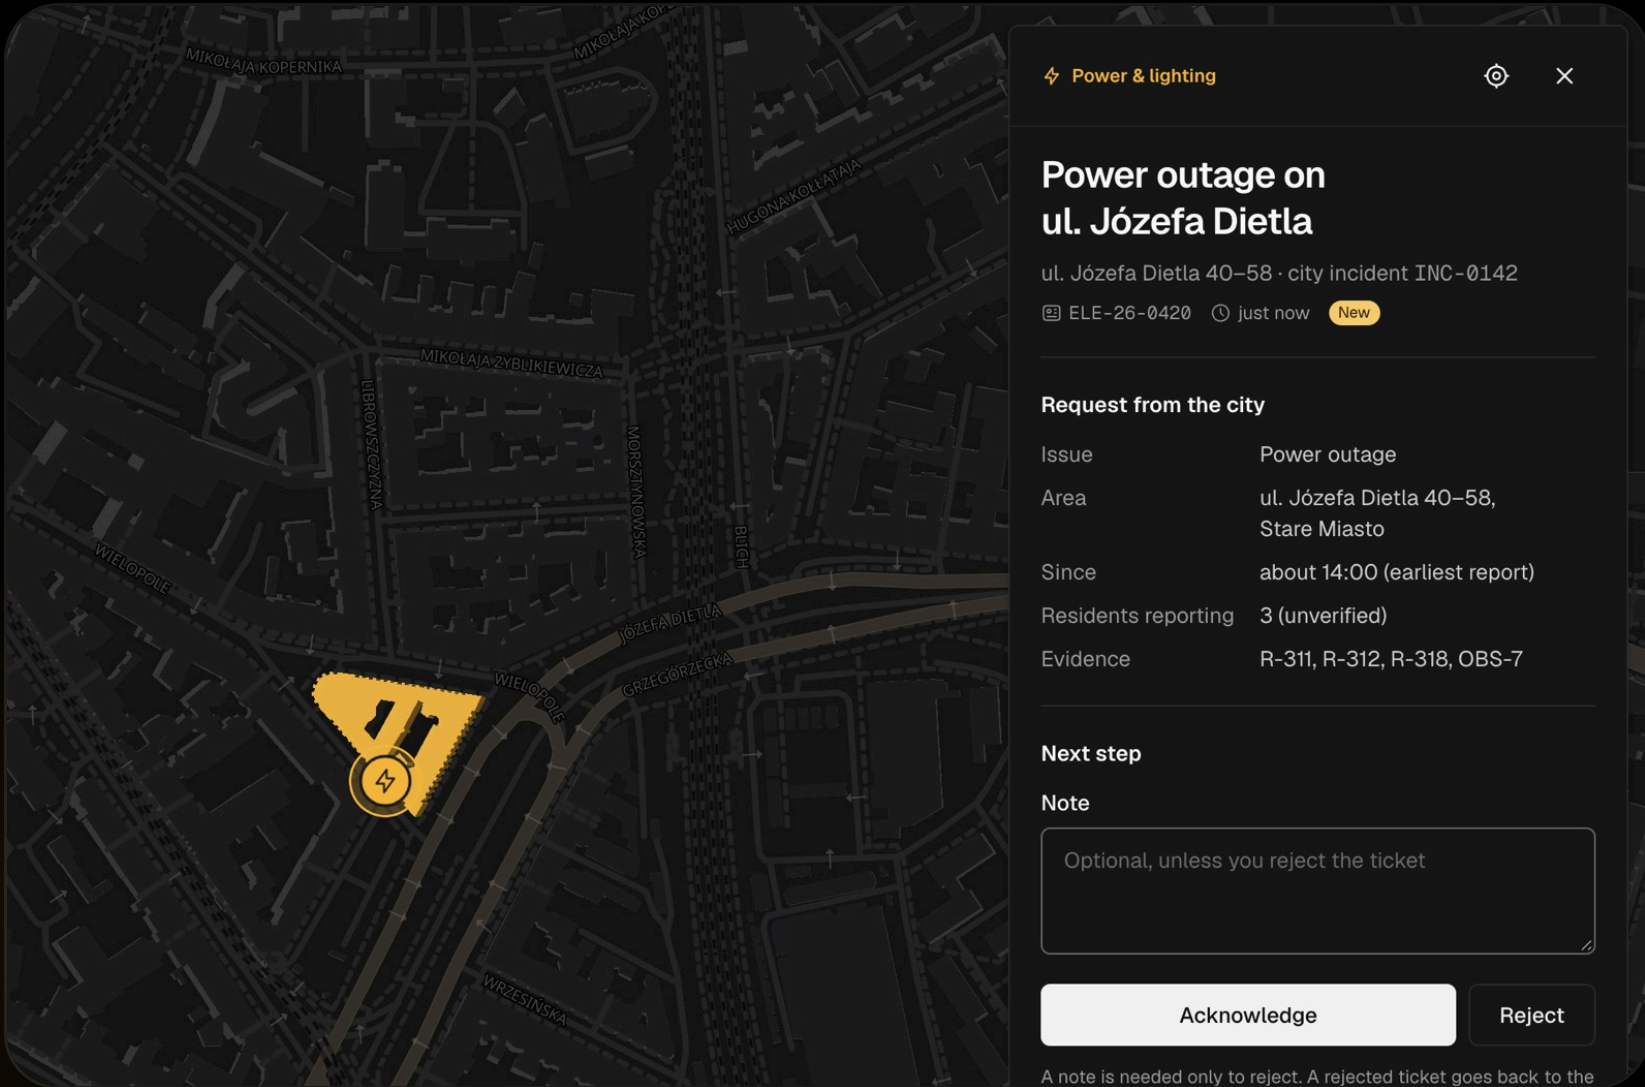

Two people at once? Every decision carries the version it was made on. A stale view refreshes; it never overwrites.

For institutions

Approved here. Received there.

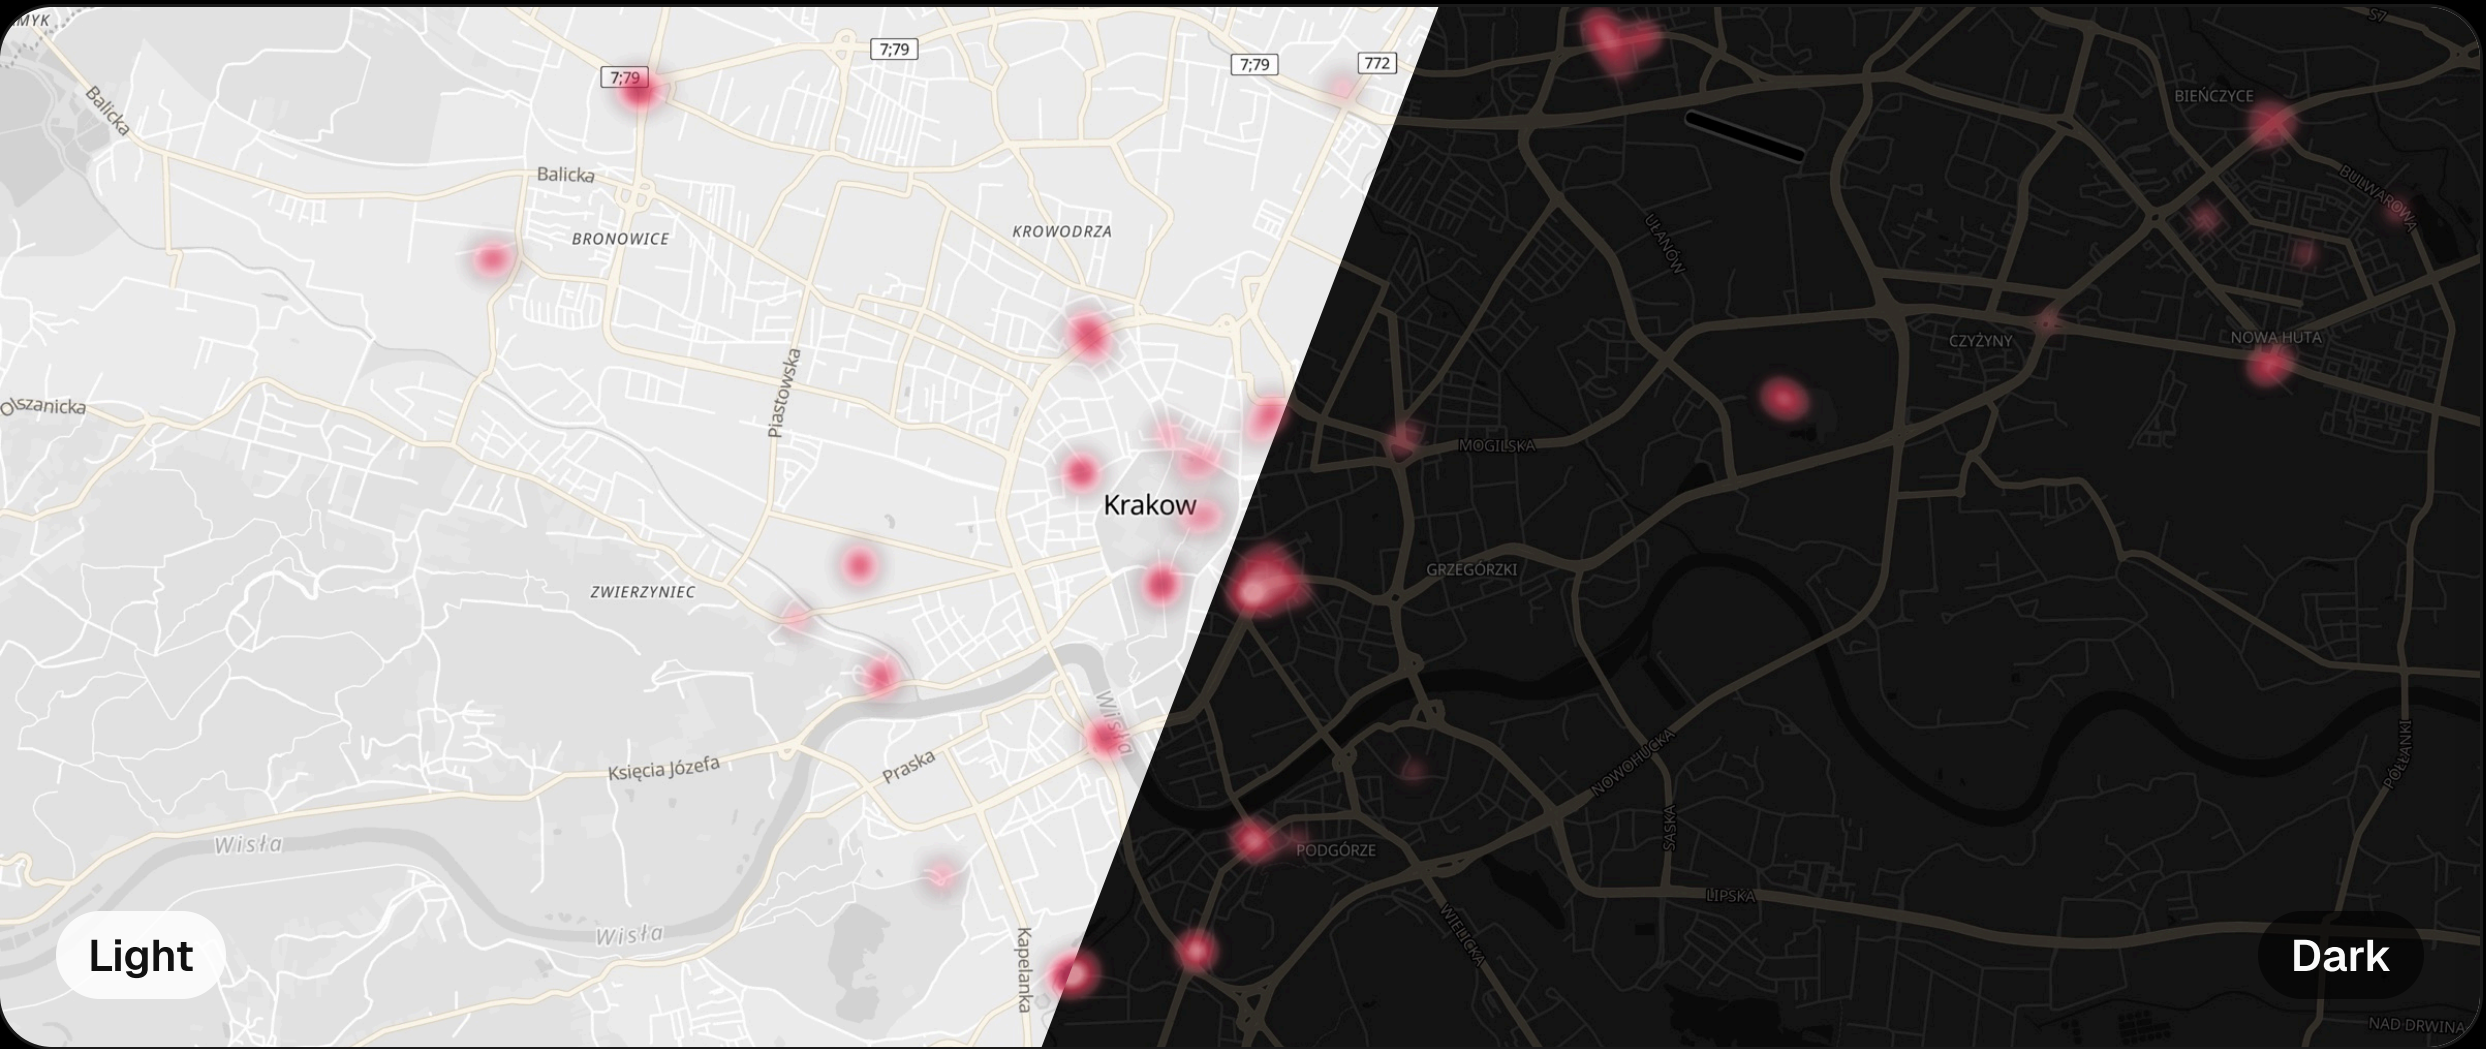

Operator · ticket ELE-26-0420 sent to the Electricity Operator

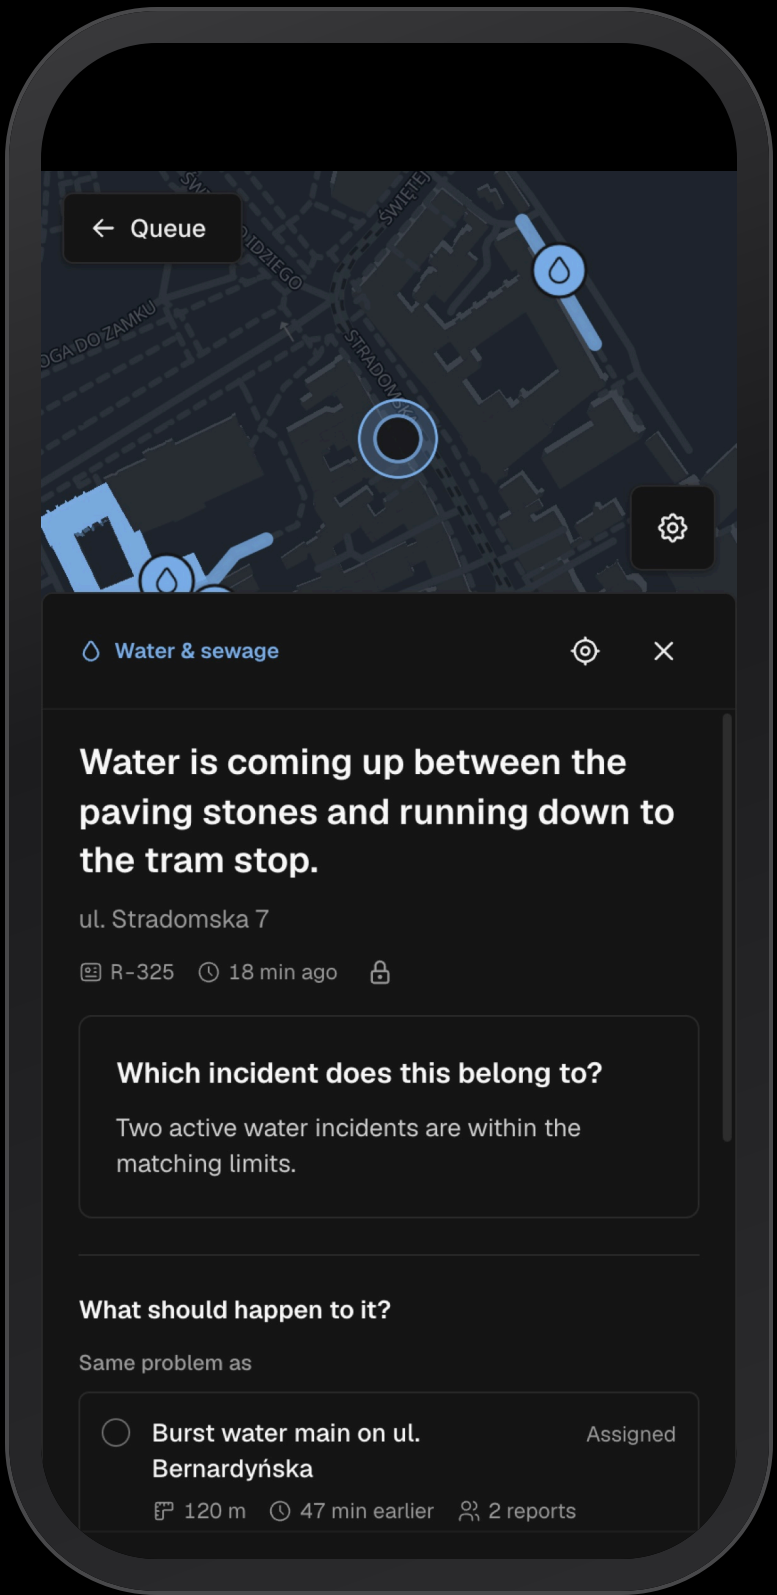

Institution · same ticket, ready to acknowledge
